**AB - JP2001089720 NOVELTY - An adhesion pad comprises adhesive layers (1,3) consisting of polyurethane resin on each side of base material (2) for mold removal. The adhesive layer (1) has adhesion power of 100-800 gf/25 mm and the adhesive layer (3) has lower adhesion power than that of adhesive layer (1).**

**- DETAILED DESCRIPTION - An INDEPENDENT CLAIM is also included for manufacture of adhesion pad which involves forming 3 kinds of sheet material which consists of (a) Sheet comprising adhesive layer (1) and a base material for mold removal, (b) Sheet comprising adhesive layer (3) and base material for mold removal and (c) Sheet having a decorative surface. The sheet materials are joined simultaneously such that the decorative surface is arranged between the base material surfaces of adhesives. The mold removal of laminate is carried out to a definite shape.**

**- USE - For pasting information on household furniture, clothing.**

**- ADVANTAGE - The pad has excellent three dimensional effect and decoration property. The pad can be manufactured easily by carrying out a mold removal.**

**- DESCRIPTION OF DRAWING(S) - The figure shows sectional drawing of adhesion pad. (Drawing includes non-English language text).**

**- Base material 2**

**- Adhesive layers 1,3**
